Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 09/715,437	Applicant(s) WATSON ET AL.	
	Examiner THOMAS H. STEVENS	Art Unit 2121	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Claims 1-14 were cancelled.
2. Claim 15-17 were examined.

Section I: Final Action

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

4. Claims 15-17 are rejected under 35 U.S.C. 102(e) as being anticipated by Deao et al. (US Patent 6,775,793; hereafter Deao). Deao discloses a data exchange system (abstract).

Art Unit: 2121

Claim 15. A method of insulating an operating environment emulator (emulating environment, column 2, lines 60-63) from a host computer (column 2, line 38), the method comprising: connecting an emulation device (figure 2, element 142) to a host computer (abstract) having an original operating system (column 4, lines 14-17, system...each having a central processing unit(CPU) for operating data files) and a host processor (column 4, lines 14-17); selecting an emulated operating system (element 142) from multiple emulated operating systems (column 1, lines 37-42) available; executing the emulated operating system (element 142) located on the emulation device using the host processor (column 4, lines 14-17) of the host computer (column 2, line 38); disabling (column 4, lines 30-36, particularly, line 36) host task management on the original operating system; routing input/output signals (figure 2, element 142, signals to and from the element 126) only through the emulated operating system (element 142); and activating an environmental shutdown by disabling (column 4, lines 30-36, particularly, line 36) the emulated operating system (element 142) in response to interactions between the original operating system and the emulated operating system (element 142).

Claim 16. The method of claim 15, wherein disabling (column 4, lines 30-36, particularly, line 36) further comprises completely isolating the host computer (column 2, line 38).

Claim 17. The method of claim 15, wherein disabling (column 4, lines 30-36, particularly, line 36) further comprises allowing a user to define allowed interactions between the host computer (abstract) and the emulation device (figure 2, element 142).

Section II: Response to Arguments

102(e)

5. Applicants are thanked for addressing these issues; however, their arguments are non-persuasive in view of the prior art since the prior art does disclose an emulated operating system ("The emulator is a software development tool that allows software under development to executed, controlled and viewed in a real hardware environment. An emulator may be hardware, software or both"; column 1, lines 37-42). Rejection stands.

Conclusion

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mr. Tom Stevens whose telephone number is 571-272-3715.
